## Profile

An independent, self-motivated, and hardworking software developer with 1 year of hands-on experience in the MEAN stack (MongoDB, Express.js, Angular, and Node.js). Skilled in building and maintaining full-stack applications, with a strong commitment to achieving project goals and delivering quality solutions.

## Skills

Angular | Node.js | Express.js | MongoDB | PostgreSQL | Django | RESTful APIs

AI Integration | Firebase | JavaScript (ES6+) | TypeScript | HTML | CSS/SCSS

Tailwind CSS | Bootstrap | RxJS | NgRx | i18n (internalization) | JWT (JSON Web Token)

Git and Github | OAuth2

## Professional Experience

**Web Developer Intern,** *Beetechnica*                   02/2025 – Present
Abbottabad, Pakistan
- Developed and maintained web applications using the MEAN stack.
- Implemented RESTful APIs, integrated third-party services (e.g., OpenAI), and worked with PostgreSQL databases.
- Built responsive, user-friendly UIs to improve accessibility and performance.
- Collaborated using Git and agile practices, gaining hands-on industry experience.

**Work and Self-Learning,** *(Before Graduation)*                   08/2023 – 11/2024
Swat, Pakistan
- Focused on self-learning in web development with Python, Django, and RESTful APIs.
- Built small projects to apply backend concepts and strengthen coding skills.
- Gained a solid understanding of server-side logic and enhanced independent problem-solving abilities.

## Education

**BS computer Science,** *Dr. Khan Shaheed Government Degree College Kabal, Swat (Affiliated with University of Swat) | CGPA 3.4/4.0*                   08/2020 – 11/2024
Swat, Pakistan

**Intermediate in Pre-Engineering,** *Government Higher Secondary School Kabal, Swat*                   08/2018 – 07/2020
Swat, Pakistan

## Projects

**Natural Language to SQL Query Generator & Explanation**
- Built a query generator using the MEAN stack integrated with OpenAI API.
- Converts natural language into SQL queries and explains results in simple, human-understandable language.

**Role Base Admin Dashboard**
- Built a role-based admin dashboard using Angular, Node.js, Express, PostgreSQL, and Flowbite.
- Implemented user registration and authentication, with admins assigning roles and permissions to each user.
- Designed dashboards with role-based access control (RBAC), ensuring that data and features are displayed according to user roles and permissions.

- Added features for user management, activity tracking, and responsive UI design to enhance usability and security.

**LinkedIn OAuth2 Integration**
- Built a MEAN stack application integrating LinkedIn OAuth2 for secure user authentication
- Implemented LinkedIn API to fetch user profile data and display it within the application
- Ensured secure token handling and seamless login experience using industry-standard OAuth2 flow.

**Chatbot Application**
- Developed a real-time chatbot using the MEAN stack with OpenAI integration for intelligent responses.

**Portfolio Website (Dynamic)**
- https://imran-ali-chi.vercel.app/ ⬈
- Built a personal portfolio website using Angular, Tailwind CSS, and Angular Material UI, integrated with Firebase for backend services.
- Developed an admin dashboard to manage content dynamically updates.

**Recipe Food App**
- https://the-recipes-spot.vercel.app/ ⬈
- Built a food recipe app using Angular, Firebase, PrimeNG, and Tailwind CSS.
- Displays detailed cooking steps and ingredients for each recipe.

**Employee Management System**
- https://employee-management-system-two-zeta.vercel.app/ ⬈
- Designed an employee management system using Angular and Bootstrap with data stored in local storage.
- Supports CRUD operations on employee records.

**Multilingual Website**
- https://multi-language-app-sandy.vercel.app/ ⬈
- Developed a multilingual website using Angular, Tailwind CSS, and i18n (internationalization).
- Allows users to easily switch between multiple languages.

**Static Portfolio Website**
- https://personal-portfolio-steel-beta.vercel.app/ ⬈
- Created a simple personal portfolio website using HTML, CSS, and Bootstrap to showcase skills and projects.

**Job Portal Web Application (Final Year Project)**
- Developed a job portal using Django, REST APIs, and PostgreSQL.
- Enabled employers/companies to post jobs, while users/employees can search, apply, and track their application status (Pending, Selected, Rejected, etc.) in real time.
- Implemented authentication, role-based access, and an intuitive UI for smooth user interaction.
